"The establishment of EIT Digital in Portugal represents a significant step towards our ultimate goal of doubling the Portuguese participation in EU related programs.

Through EIT Digital, we must work collectively to strengthen knowledge production and diffusion, and to guarantee the qualification and specialization of the labour force to foster better jobs throughout all sectors of the economy."

**Manuel Heitor.** *Portugal's Minister for Science, Technology, and Higher Education, at the opening of the EIT Digital Braga office*

"Our vision is for a Scotland where innovation is an intrinsic part of our culture, our society and our economy. For decades, Scotland has participated in European projects, led strategic partnerships and welcomed people from across the EU and around the world.

This project will allow academia and businesses to work together to drive innovation."

**Ivan McKee.** *Scotland's Minister for Trade, Investment and Innovation, at the opening of the EIT Digital Edinburgh office*

"The Estonian innovation ecosystem is lively and vibrant, which is illustrated by numerous examples of very successful startups.

But this ecosystem requires stronger links with European actors and I consider the EIT Digital Tallinn office as a great opportunity to establish and develop these connections in order to achieve an inclusive, fair and sustainable Europe."

**Gert Jervan.** *Dean of the School of Information Technologies at Tallinn University of Technology*

# AN EIT DIGITAL REGIONAL OFFICE CONSISTS OF A VIBRANT DIGITAL INNOVATION AND EDUCATION PARTNERSHIP

Actors in digital deep tech ecosystems	Actors' needs	Actors' contribution
Universities	Students & Research financing	Talent, Technology & Spin-offs
