

# WE GROW DIGITAL

Welcome to the second issue of the 2024 edition of the EIT Digital newsletter!

In this issue, we are excited to announce a significant partnership with [Riga Technical University](#) (RTU), marking a major step in our ongoing commitment to advancing digital innovation and education across Europe. This collaboration opens a host of opportunities for commercialization, training, and networking that are set to benefit not only RTU but the broader European tech ecosystem.

Moreover, we delve into the **transformative potential** of vocal biomarkers in healthcare, exploring how everyday sounds could become pivotal diagnostic tools, as detailed in our feature article in [Grow Digital Insights](#).

We're also thrilled to reintroduce our [Generative AI ESSENTIALS](#) course, now enhanced with a focus on cybersecurity alongside other in-demand digital skills and **with a special 50% discount for newsletter subscribers** (use the discount code below). This course is designed to equip you with the knowledge and tools necessary to thrive in the rapidly evolving digital landscape.

Finally, we share an inspiring story of entrepreneurship from a former EIT Digital Master School student who, after an enriching experience at Amazon, [is pioneering](#) a tech startup in Italy.

Join us as we explore these exciting developments that continue to push the boundaries of innovation and digital expertise in Europe!

---

**EIT Digital welcomes Riga Technical University**

We are thrilled to [announce EIT Digital's latest partnership](#), with Riga Technical University (RTU). This marks a significant milestone in our journey towards fostering cutting-edge digital skills and innovation across Europe.

**Why it matters:** With RTU on board, the doors swing wide open to:

- **Commercialization support:** Transforming student and researcher innovations into market-ready solutions.
- **Access to grants and training:** Elevating the academic and practical prowess of RTU's community.
- **Expansive network:** Connecting with investors and global partners to scale new heights.

**What's Coming?**

- **Digital skills courses:** RTU kicks off the spring semester with high-level courses, including the EIT Digital Master School program "Fintech for Business."
- **International Summer School:** Themed "Cyber Security - Agile Methodology for Developing New Solutions," focusing on key challenges in civil protection and 5G innovation.

As EIT Digital continues to expand its influence, partnerships like these are pivotal in shaping a digitally proficient Europe, ready to lead on the global stage. With RTU now in the mix, watch for exciting developments that push the boundaries of what's possible in tech and innovation.

## Your voice: the future of health monitoring? [Grow Digital Insights #2](#)

Grab your smartphones and tune into something that might just transform the future of healthcare—your voice!

**The sound of health:** In an [eye-opening feature](#) by Fulvio Cordella, co-founder of VoiceMed, we explore how the subtle sounds you make every day could soon be key to early health diagnostics. Imagine your smartphone transforming into a critical health monitoring device, using just the power of your voice.

**Why it matters:** Why should you care about the sounds of your health? It's all about

prevention. Your future phone might detect risks for serious conditions like heart disease or COPD by analyzing nuances in your voice, turning everyday technology into a proactive healthcare tool.

**Dive deeper:** Intrigued? Check out the full scoop in the latest [Grow Digital Insights](#). We have now **added the option to comment** below each article. Join the conversation on how our voices might not just speak our thoughts but also echo our health futures.

## Discover the Power of Generative AI with EIT Digital's Enhanced Course

EIT Digital's [Generative AI ESSENTIALS](#) course is back, now more comprehensive and engaging than ever before. This revamped course is designed for both seasoned AI professionals and those new to the field, offering an in-depth exploration of Generative AI's revolutionary potential.

Now incorporating a vital focus on cybersecurity, the course is set to provide participants with the skills needed in today's most in-demand areas, including project management, marketing, and customer journey optimization.

**Enjoy a 50% discount**, reserved for EIT Digital newsletter subscribers. **Use the EITDNL50 code** when enrolling.

### Why This Course is a Must:

- Generative AI is revolutionizing industries, making it essential to stay current with the latest advancements.
- Customizable learning paths ensure that you receive the education that best

fits your needs.

- Dynamic, interactive sessions make learning both effective and enjoyable.

#### Course Details & Offers:

- **Schedule:** Weekly sessions over four weeks—because great learning takes time.
- **Cost:** €49 for one session or €99 for the entire four-session series.
- **Language:** All instruction is provided in English.

Are you ready to step into the future? Enhance your skills, broaden your understanding, and confidently move forward in your career.

## From EIT Digital Master School, to Amazon, to entrepreneurship

Former Master School student Filippo Caliò, shared on LinkedIn [a great story](#) about the professional path that he and three other fellow students took after finishing the MSL.

As a fresh Business Intelligence Engineer, Filippo, wrapped up an enriching internship at Amazon in Luxembourg. Now, with his friends, he's taking a giant leap back to his roots in Italy to start an exciting new venture.

**The Amazon experience:** Working at a tech giant like Amazon isn't just about the name on your resume. As Filippo's wrote, Amazon's environment pushes you into the deep end, surrounded by a pool of brilliant minds, offering a unique blend of responsibility and learning.

**The next adventure:** After two years of global exposure, it's time to bring home the learnings. Meet [Levels](#), the startup brainchild conceived by Filippo, Tommaso, Dario and Emanuele, who lived, worked, and brainstormed together in Luxembourg. The mission? To bridge the gap between the market demands and the latest technologies in AI and Data Science, driving the growth of the Italian ecosystem, one innovative step at a time.
